Believe it or not February has been a very busy month. The building is coming along quiet nicely and is on schedule. The contractor says it should have the outside wall in and starting on the interior next week. We should be in our new facilities by summer. As you are aware, when you build something there are always changes or mistakes made that have to be corrected. I want to thank the Port of Kennewick for their corporation and understanding. We plan on being good custodians of the Ports facilities and want to make this a great facility.

Courtney and Rod have stepped up and are planning on regular walk thru to make sure the little things get taken care of before its too late. Once the sheet rock is in place it makes it much harder to move an electrical receptacle.

As the majority of the Boards concerns are with the construction project our entertainment activities have been cut because we don't have a place to have them. Next year our crab feet will be bigger and better than ever before and the St. Patrick's Day festivities will have a lot of green beer.

We have had some problems with the gate on the docks and will have it fixed at the work party. We are not replacing the magnetic lock at this time due to costs and the short period we will need it. To resolve this problem we have had keys made for all members. Only one key per family has been made so if you want additional you can have more made yourself. The keys are in the office and any board member can issue them to you.

A good time to get your new key would be at the work party. That activity is scheduled for March 22. We will meet at the Club House at 8 AM for assignments. Each Trustee will have a list of activities to be performed. Also remember to contact Bob Brackett at the work party and sign in or you will receive an additional \$100 on your bill for next year.

I also want to thank Cal and Mary again for their good work with the RBEW. This had turned out to be a very important activity for all boaters. Before Cal and Mary got involved as our representatives the boating population of the West side thought the boating activities stopped at the Cascades. Also Cal is making arrangements to get the water turned on as soon as possible on the docks. We will have to put in some temporary lines to work around the construction.

Remember Spring is just around the corner.
